1. OVERVIEW

A Series

- 1. Weather shield
- 2. IR LEDs
- 3. Camera
- 4. Speaker
- 5. Call button
- 6. Microphone
- 7. Screw slot
- 8. Keypad LED
- 9. Cover
- 10. Volume regulator
- 11. Anti-vandal switch
- 12. System port

B Series

- 1. Weather shield
- 2. IR LEDs
- 3. Camera
- 4. Speaker
- 5. Call button
- 6. Microphone
- 7. Screw slot
- 8. Cover
- 9. Volume regulator
- 10. System port

C Series

- 1. Weather shield
- 2. IR LEDs
- 3. Camera
- 4. Speaker
- 5. Call button
- 6. Microphone
- 7. Screw slot
- 8. Keypad LED
- 9. System port
- 10. Tilt pad

2. Description

Function	Descriptions
Weather shield	Affix and protect outdoor camera from rain/snow
IR LEDs	Provides illumination with IR LEDs for better visibility.
Camera	Capture image to transmit to display
Speaker	Sound from indoor monitor
Call button	Call indoor monitor for intercommunication
Microphone	Transmit voice to indoor monitor
Screw slot	Slots for installation screws
Cover	Cover of screw slot
Volume regulator	Increase/decrease the speaker volume
System port	Connect the indoor unit and the door lock
Tilt pad	Camera can be moved up and down at +15°C view angle
Power port	Connect with power supply
Anti-vandal switch	Removing the outdoor camera will trigger ringing alarm

3. SPECIFICATIONS

Camera sensor	1/4 inch pinhole CCD/CMOS camera
View angle	60°
Definition(Hor.)	420/600/700 TV Line
LEDs for night	IR LEDs(60°)
Power consumption	150mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50°C
Installation	Surface/flush mount 1/4 inch pinhole CCD/COMS camera

Camera	1/4 inch pinhole CCD/CMOS camera
View angle	60°
Definition(Hor.)	420/480/600/700 TV Line
LEDs for night	IR LEDs(60°)
Power consumption	200mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50°C
Installation	Surface/flush mount

D Series

1. Weather shield

3. SPECIFICATIONS

	
A Series	
Camera sensor	1/4 inch pinhole CCD/CMOS camera
View angle	60°
Definition(Hor.)	420/600/700 TV Line
LEDs for night	IR LEDs(60°)
Power consumption	150mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50℃
Installation	Surface/flush mount 1/4 inch pinhole CCD/CONIS camera

	
B Series	
Camera	1/4 inch pinhole CCD/CMOS camera
View angle	60°
Definition(Hor.)	420/480/600/700 TV Line
LEDs for night	IR LEDs(60°)
Power consumption	200mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50℃
Installation	Surface/flush mount

Camera	1/3" B/W CCD camera
View angle	60°
Definition(Hor.)	380TVLine
LEDs for night	IR LEDs(60°)
Power consumption	150mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50℃
Installation	Surface mount

D Series

Camera	1/4 inch pinhole CCD/CMOS camera
View angle	68° (view angle of the model including character "R" can be up to 110°)
Definition(Hor.)	420/600/700 TV Line
LEDs for night	IR LEDs(60°)
Power consumption	200mA max.
Power supplier	Supplied from indoor unit
Operation temp.	-40~+50℃
Installation	Surface/flush mount

ADJUST CAMERA ANGLE

The tilt control allows the camera to be moved up and down. At the backside of outdoor unit, you can find out a tilt pad(shown as below)which is used to adjust the camera angle up and down at $\pm 15^\circ$ view angle, therefore it ensures that the visitors regardless of height can be seen at a suitable sight.

D Series

The terminal is defined functionality as below:
 1. Red:DC12V 2. Yellow: Audio
 3. Black: GND 4. White:Video
 5. Red&Wh:DV12V(Camera)

The terminal is defined functionality as below:
 1. Red:DC12V 2. Yellow: Audio
 3. Black: GND 4. White:Video

E Series

The terminal is defined functionality as below:

1. Red: DC 12V
2. Yellow: Audio
3. Black: GND
4. White: Video

2 Dry contact

In the standard delivery the system supports locks with Normally Open(N.O.) door unlocking method. It means that in the normal state the dry contact(marked as 2) is opened, so the lock is kept under constant closed state. If the unlocking button is pressed and the dry contact is changed to closed, then the lock is released.

F Series

The terminal is defined functionality as below:

1. Red: DC 12V
2. Yellow: Audio
3. Black: GND
4. White: Video
5. Red&Wh: DC 12V(Camera)

5.INSTALLATION PROCESS OF OUTDOOR UNITS

The speaker volume is too low ,how to increase it?

At the backside of outdoor unit, you can find out a regulator (Marked as ⑤) which is used to adjust the speaker volume, turn the regulator with the screwdriver to decrease/increase the speaker volume.

NOTE:

- Avoid installation of the device near strong radiation e.g. AC motor and lift.
- Maintenance should be complied with qualified technician.
- Avoid hard shake, beating and collision. otherwise the internal exact components maybe be damaged.
- Do not expose the outdoor camera under strong light or sunshine.
- Do not install the outdoor camera in the environment e.g. direct sunlight, contact rain, high temperature, high humidity, full of dust and chemistry corrosive.
- Select the most suitable position where the camera is located at user's eye level.
- Switch off power supply before installation.
- Keep more than 30cm away from AC power supply to avoid external interference.
- Keep it away from the water and magnetic field.

You have two options to install outdoor camera: Flush mount and Surface mount

F Series

To install Model B outdoor unit , please follow these steps as reference :

1. Select the most suitable position where the camera is located at user's eye level, then drill 2 holes according the weather shield, embed 2 plastic anchors into the holes.

Hole ● --- Plastic anchor

2. Use a screwdriver to affix the weather shield with the installation screws.

Installation screws

3. Drag the connection cable through the hatch at the bottom side, plug the 4P + 2P plastic conductors into the relevant socket.

4. Embed the outdoor unit into the weather shield and affix with the supplied screws.
